**KANFIT3D MEDICAL**  
Your partner for custom made implants

**Your 3D additive  
manufacturing company**

## **Kanfit3D manufactures:**

- Patient specific implants in Titanium.
- Patient specific instruments, especially cutting gigs.
- Anatomical models.

We supply products of the highest industry standards based on 3D printing technology.

Under the guidance of top clinicians, Kanfit3D works to overcome challenging pathologies in order to address the needs of children and adults.

We offer great flexibility, addressing both the trauma and elective surgery markets.

The company's 3d planning, designer and manufacturing teams are experienced in working with complicated biomedical structures.

Our processes are developed together with researchers and leading clinicians in order to quickly and cost-effectively manufacture products of the highest standards.

Our quality Management System is ISO13485 certified, and our technology is well recognized worldwide.
